## Business Benefits:

### Ensure security and validity

Any recipient of a document digitally signed with the DocuSign Connector can easily verify the signature.

### Paperless signature approvals

Skip the process of having to print documents only to sign and scan them back in. Go paperless without drastic changes to existing processes.

### Increase efficiency

Integrate signing tasks directly into DM Extensions for OpenText eDOCS shortening turnaround times by eliminating the "print-sign-scan" process.

### Improve compliance

Documents signed using DocuSign comply with the most stringent international, national and industry regulations for electronic signatures.

## DocuSign Connector for OpenText eDOCS ROI points:

- ❑ A single right-click action to initiate the signing process within OpenText eDOCS, shortening the signing process to seconds.
- ❑ Increase efficiency by having all signed documents automatically saved back into OpenText eDOCS as a new version or new document when signing is completed by all parties.
- ❑ Flexible and rich configuration options to match your organisation's workflow, simplifying the e-signing and DMS management process.
- ❑ Complete audit trail and traceability, meeting or exceeding your security policies and practices.
